

WHAT IS SEAFORD'S POLYSACCHARIDE IRON COMPLEX (PIC)

In Polyride Fe[®] Ultra, Seaford Pharmaceuticals combines clinically backed PIC with a smart, balanced formulation that enhances absorption and minimizes discomfort. The result? A powerful, easy-to-take supplement that fits into real life.

WHY IT MATTERS

**gentle on
digestion**

Seaford's PIC is non-ionic, meaning it won't irritate your stomach like older iron salts. It's less likely to cause nausea, constipation, and cramping.

**efficient
absorption**

Iron is bound to a protective polysaccharide, allowing it to move smoothly through the digestive tract and be absorbed where it matters most—in the small intestine.
